# Introduction

EverGrow launched in September 2021, is the fastest growing cryptocurrency of its kind, automatically rewarding holders in Binance USD (\$BUSD), a regulated, stable-coin, pegged 1:1 with the US dollar.

It is a decentralized platform that bridges the gap between crypto and fiat currencies and brings the benefits of the crypto world to everyday people. Based on the Binance Smart Chain, EverGrow has up to 10x quicker block speeds and lower gas fees compared to many projects competing in this space.

EverGrow is proud to be the world's leading Yield Generation token rewarding its holders in \$BUSD. It is establishing a new standard in DeFi Tokenomics with its innovative and game changing token distribution strategy. EverGrow is intended to be held longer term to generate passive income and capital growth. Due to the stable-coin rewards being paid on all transactions, investors benefit during both Bull and Bear markets.

## Abstract

As the leading cryptocurrency that rewards its users in \$BUSD, EverGrow is a front runner among all cryptocurrencies. With its anti-Whale system, EverGrow discourages Whale sells by limiting any sell amount to a maximum of 0.125% of the circulating supply. Holders of EverGrow get rewarded in \$BUSD, a first in the history of cryptocurrency. With every transaction, a small percentage of tokens are automatically transferred to the PancakeSwap Liquidity Pool.

EverGrow also maintains a BuyBack reserve which accumulates Binance Coin (\$BNB) securely in the EverGrow contract. These \$BNB are then used for strategic BuyBack & Burn – the contract Buys EverGrow, creating volume, rewards, & positive price action, then sends those tokens to the Burn address – removing them permanently from circulation, including rewards eligibility. This last step means holders of \$EGC continuously receive a higher overall share of rewards distributed and circulating supply reduces over time.

The EverGrow Ecosystem includes:

LunaSky; an NFT marketplace for buying, selling and lending NFTs.

Crator; the first social media platform to integrate crypto tips, subscriptions and payment options.

The Abstract; a metaverse partnership where users can enter a virtual 3D world and experience gaming, NFTs, socialising and more in a manner never experienced before!

Along with EverGrow Wallet and the EverGrow Exchange.

# The EverGrow Protocol

On the Binance Smart Chain (BSC), EverGrow is the next generation of reflection token: the leading \$BUSD reflection token to optimize user profits both now and in the future. Simply hold \$EGC tokens to automatically receive a proportional share of 8% of every transaction in \$BUSD. This is automatically transferred to your wallet.

EverGrow has a total supply of 1,000,000,000,000,000 \$EGC. From the initial release, 50% of tokens were sent to the burn address, and further tokens are burnt daily via the BuyBack & Burn feature.

- 8% of every transaction is redistributed to holders in \$BUSD, which is automatically paid every 60 Minutes.
- 2% of every transaction is transferred into Liquidity Pool for PancakeSwap to create a stable price floor.
- 2% of every transaction is transferred into Smart Contract for strategic BuyBack reserve.
- 2% of all transactions are dedicated to marketing and development.

## The Technology Behind EverGrow: Binance Chain

Binance Smart Chain (BSC) was created to enable the use of solidity-based smart contracts at a significantly faster and more efficient rate than other competing chains.

With decentralized exchanges on BSC providing lightning-fast transactions and ultra low costs, BSC has established itself as one of the world's leading blockchains for Decentralized Finance (DeFi). BSC makes use of BEP-20 token technology, a proprietary blockchain that ensures the security and privacy of all users and developers.

Its inherent dual-chain interoperability enables cross chain communication and scalability of high performance, decentralized applications (dApps) that lead to a quick and fluid user experience. It is EVM compatible and will support all current Ethereum tools, with faster and more affordable transactions. Based on the Proof of Stake consensus, its on-chain governance allows decentralization and substantial community participation via the use of 21 validators that verify transactions.

**SMART CHAIN**

## **Ecosystem/Roadmap**

EverGrow is creating an ecosystem of utilities designed to generate additional sources of passive income for holders. The net-profits from all these utilities will be used for our BuyBack & Burn function, creating green candles and \$BUSD rewards for holders.

### **LunaSky NFT Marketplace**

Mint, Buy and Sell NFTs, including any that you obtain through liquidated collateral from the NFT Lending platform. The marketplace will also include a minting tool that will let users create their own NFTs from images, videos & other data.

### **Crator Social Media Platform**

The world's first Content Subscription Platform to integrate both Crypto and FIAT payment options. Users can choose to use FIAT, other cryptocurrencies or \$EGC to purchase content, tip & message content creators, or subscribe for regular content. Creators can opt to be paid in \$EGC, other cryptocurrencies or FIAT, with the lowest commissions in the industry.

### **EverGrow Crypto Wallet**

Buy, Sell and Swap your crypto on a wallet fully designed for the latest revolutionary rewards tokens, along with traditional crypto investing. Fully integrated, multi reward-options tokenomics.

### **EverGrow Exchange**

Full, seamless tokenomics integration, allowing rewards in native and non-native currencies to be paid flawlessly and automatically to holders, along with the option to Buy, Sell and Swap traditional cryptocurrencies.

### **EverGrow Meta**

In partnership with Objective Reality, A virtual world that brings together the entire EverGrow Ecosystem. Browse LunaSky NFTs in a fully-immersive 3D gallery, meet friends & influencers on Crator, play VR games, or shop in virtual stores with your crypto wallet.

## EverGrow Team

A talented group of experienced business leaders, developers and marketing specialists, the team is overseen by Sam Kelly, an award-winning investment manager and entrepreneur whose expertise and experience spans over 20 years in business. Lead Developer Ajeet Singh and Marketing Manager Praveen Rai both bring years of experience to their roles, with Ionut Iacob (Jacob) overseeing operations. Our Community Management team manage a 75 person strong group dedicated to providing service and support to our 138,000 holders worldwide.

## The Evolution of Passive Income

EverGrow's vision for a completely new way to look at passive income is simple: hold EverGrow in your crypto wallet and let us do the rest! You will earn passive income 24 hours a day through our revolutionary blockchain-based tokenomics system. A very different way to see passive income from traditional sources like rental properties, royalties or stock dividends. Initially your rewards are generated from every Buy, Sell, or Transfer of EverGrow Token (\$EGC) based on the total amount of \$EGC you hold. When our suite of revenue generating utilities are launched, these will create further sources of passive income for holders.
